

Building houses

- Look at this picture of a house.
- Think about the materials that each part listed below is made from. Say why that material is used for that part.

Part of house	Made from	Why?
Window		
Roof		
Door		
Guttering		
Walls		
Door handles		

- Try these questions about what would happen if we used the wrong materials:

1. What would happen if we made an umbrella out of paper?

2. What would happen if we made a hammer out of glass?

I can say why materials are used for specific purposes.

How did you do?
